

Solutions Recovery, Inc. Celebrates One Year Anniversary

LAS VEGAS, NV – March 11, 2008, Solutions Recovery, Inc., a treatment provider for chemically dependant adults, celebrated its one year anniversary.

To commemorate this milestone, a reception was held on March 5, 2008 at the Dapple Grey Treatment Center.

During their inaugural year, Solutions Recovery, Inc. launched several programs to assist adults struggling with a drug or alcohol addiction including a Chronic Pain Program, an Intensive Outpatient Program and a Residential Treatment Program for treating substance abuse.

“Through the inception of our three programs,” said Mike Adams, VP of Clinical Operations for Solutions Recovery, Inc., “we have been able to offer assistance to Southern Nevadans struggling with a chemical dependency.”

All clients receive individual treatment plans taking into account such factors as client’s lifestyle, ethnic and cultural background, special needs, and support systems that will enhance the person’s recovery process. Multiple modalities are utilized to treat the physical, emotional, mental and spiritual components associated with substance abuse.

Individual counseling, group counseling and 12-step meetings are cornerstones to all three programs. Additionally, a high emphasize is placed on family involvement by providing family counseling and psycho-education regarding substance abuse for family members.

“I am so proud that Solutions Recovery, Inc. has touched over one hundred people and their families in our first year,” states David Marlon, President of Solutions Recovery, Inc. “I also appreciate the community’s resounding support of our program.”

Clients in the Chronic Pain Program receive treatment for pain caused by injury or physical dysfunction while simultaneously treating the co-occurring disorder of chemical dependency. Clients work with a physician on a daily basis, as well as counselors, to reduce pain symptoms and treat the chemical dependency.

The Residential Treatment Center employs a holistic approach. In addition to the 30+ hours a week of counseling, clients receive a host of services such as acupuncture, gourmet chef, massage, personal gym training, spa appointments and yoga.

The Intensive Outpatient Program allows individuals to receive individual, group and family counseling while still maintaining their current professional or personal responsibilities.

Over 100 patients have graduated from the Solutions Recovery, Inc. programs.
